DETAILED ACTION

EXAMINER'S AMENDMENT

1. The interlineations or cancellations made in the specification or amendments to the claims could lead to confusion and mistake during the issue and printing processes. Accordingly, the portion of the specification or claims as identified below is required to be rewritten before passing the case to issue. See 37 CFR 1.125 and MPEP § 608.01(q).

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joseph Mayo on 31-January-2006.

The application has been amended as follows: Claims 170-180 are cancelled.

Allowable Subject Matter

3. Claims 91-169 are allowed.

4. The following is an examiner's statement of reasons for allowance:

The Appellants' arguments in the Appeal Brief filed on April 15, 2005, have been fully considered and are found persuasive.

The prior art of record Wotring et al. (U.S. Patent No. 6,665,677) in view of Bliss et al. (U.S. Patent No. 5,999,938), in further view of Mehr et al. (U.S. Patent No. 6,141,658), does not teach, disclose or suggest:

A computer program product consisting of a computer-usable medium having a computer program for transforming a source data structure to a destination data structure. The computer program configured to join a plurality of source tables selected from the set of source tables; parse a source field selected from the set of source fields and split the source field into a plurality of destination fields; partition a plurality of source fields selected from the set of source fields into a combined destination field; transform a source value into a destination value having a different data type or different unit of measure; access a first source field of the source data structure and display all existing values for the first source field and obtain transformation data associated with all existing values to all for field-at-a-time handling of the set of source fields to eliminate run-time exceptions; and transform the at least one set selected from the set of source tables, the set of source fields, the set of source records, the set of source table relationships and the set of source values into the at least one target destination, as claimed in independent claim 91.

Claims 92-169 are allowed because they are dependent on independent claim 91.

Art Unit: 2164

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
